Atelier B Professional Edition 25.05

© CLEARSY

– May, 2025

1 Introduction

Release 25.05 of Atelier B Professional Edition adds new features and contains several bug fixes.

In the following, all the details of the changes are listed.

2 Changes

- Adds support for ${VAR} syntax (in addition to $VAR) for environment variables in resources.
- Adds the option to remove trailing whitespaces in the editor.
- Adds the option to sort *user pass* proofs by estimated cost to improve replay time.

3 Fixes

- Fixes use of environment variables in resources.
- Fixes *user pass* proofs generation when no filter are used.
- Fixes Certifier archive export on Windows.
